Innocent

by Gio Tiroto

bookcase

description

material - finishing

size

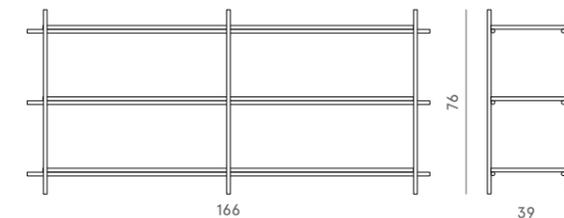

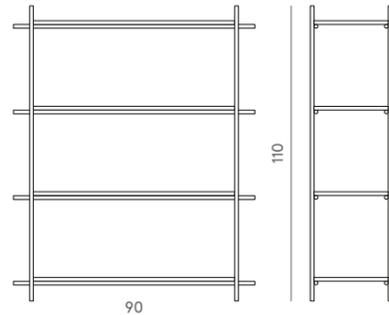

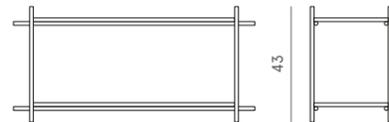

sizes are in centimeters

— The Innocent project is inspired by the industrial systems of metal joints and pipes, and emphasizes the relationship between the simplicity of shapes and Mingardo's craftsmanship excellence. The Innocent modular system consists of shelving tops in black painted oak, connected by a tubular black-colored structure. The system allows to create different furnishing elements, from low tables to consoles to bookcases of various heights.

Tartan

by Simone Bonanni

table

description

material - finishing

size

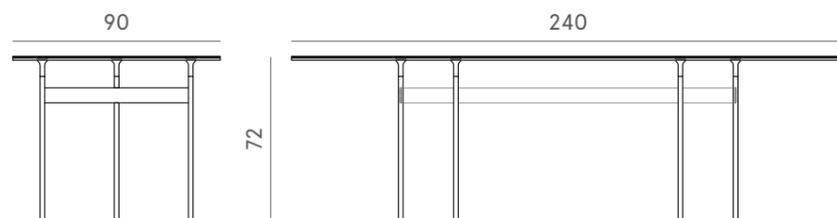

sizes are in centimeters

— Horizontal and vertical lines cross, touch and overlap each other; this is how they design an essential twine in space, a product made of air and metal. Visually geometric and rigorous, Tartan exists on the balance between surfaces and voids.

The thin blade of light that runs along the edge of the top claims its elegant and exclusive uniqueness. The structural elements become aesthetic, evident only after a more careful consideration.

Ilario

by Federica Biasi

mirror

description

material - finishing

size

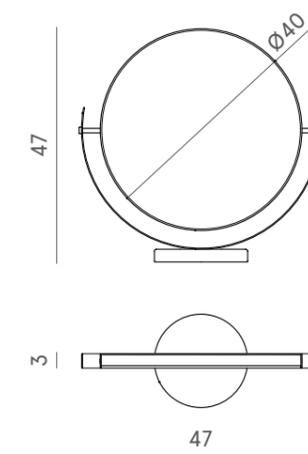

sizes are in centimeters

— The name of the mirror describes its essence: Ilario was the founder of the Mingardo workshop, known for its architectural collaborations with Carlo Scarpa. Taking inspiration from the historical circular windows of the workshop, it is an object rich in meanings. The mirror, Ilario, reflects the heritage of the company as well as an ancient artisanal virtuosity, in a product that draws its flair from the stylistic features of the past.

This mirror has been chosen as the icon for the new artistic direction of the Collection itself.

Factory Stool

by Omri Revesz,
 Damian Tatangelo

stool

description

material - finishing

size

sizes are in centimeters

— The refinement of craftsmanship and the practicality and directness of the working factory merge, creating a series of objects that are as alive and dynamic as tools.

The collection draws from the beauty in the robust and highly functional structures, purposely created to facilitate the production process and to last through time. As such structures are simply out of necessity, honest and poetic highly adaptable forms are generated.

The typical three or four leg frame is substituted with a T frame, therefore seeming mobile and suggesting graphic applications to the space.

wall cladding

description

material - finishing

size

sizes are in centimeters

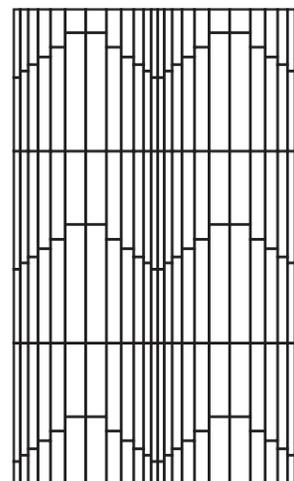

— Wall cladding consisting of tidy facets, assembled in Art Deco style.

The succession of forms creates an optical curvature effect that reminds the columns of historic buildings. The fine combinations of finishes, colours and materials underline the three-dimensional effect.

Natural satin iron, natural satin brass, antique blue iron, burnished iron, black iron

modular pattern

Ted Luggage Cart

by Zanellato/
Bortotto

luggage cart

description

material - finishing

size

sizes are in centimeters

— A modern luggage cart specially designed for Wallpaper* Handmade 2016.

4ROOMS represents a contemporary reinterpretation of the traditional luggage cart used in luxury hotels. Designers focused on materials and details, trying to capture the best craft skills from Mingardo.

The vertical protections on each side become aesthetic details also protecting luggage from falling. The design of the traditional carts is completely reinvented, and the result is contemporary and sophisticated.

The materials used are brass and iron tubes, curved and welded together.

Each protection is laser cut with a customizable texture.

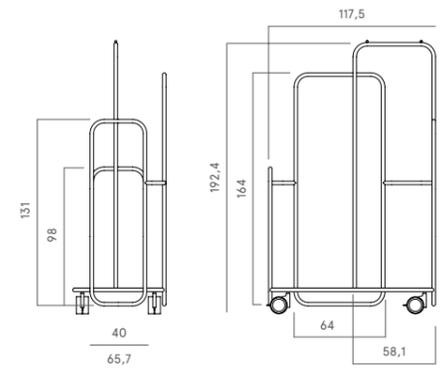

^STRUCTURE: Brassed finish
PROTECTIONS: Natural iron.
Customizable pattern with the possibility of adding the brand logo.

®STRUCTURE: Natural iron
PROTECTIONS: Brassed finish.

Materials Finishes and Colours

Mingardo is pure expression of Made in Italy.

Specialized in metalworking, the company does not know any secrets about iron, stainless steel, brass and copper.

For more than 50 years the company has been working these materials.

Cutting, bending, welding, calendering.
Brushing and polishing, varnishing, superficial treatments with acids and galvanizing processes.

There are so many different surface effects that can be obtained to the same metal plate, you just have to imagine them.

Everything is always handmade, in a production process that is respectful of the tradition and capable of transmitting the highest quality craftsmanship.

The passion for this material and the pure dedication in working it, allowed Mingardo to create this collection, full expression of his own productive abilities.

As in a tailoring process of inlay, so Mingardo becomes the tailor of metals, customizing on demand forms and materials.

Polished or brushed, protected or not, metal is a material able to fascinate and change over time and places. If not protected, oxidation inexorably will produce its effect, and will make the metal even more sophisticated, in full symbiosis with the place where it has been placed.
