

Piega

by Aldo Parisotto,
Massimo Formenton

wall lamp

description	material - finishing	size	sizes are in centimeters
<p>— Piega is a bright item made of black steel and raw brass. The wall lamp is realized with the combination of bending metal sheets. The overlapping effect of metal sheets creates a sculpted shape; while inside the lamp, there is an E27 light bulb with cable and plug. It generates unique and different bright shapes on the wall using only a small spike. By using more of them you will create different light games on the house walls.</p>	<p>[^] Satin natural brass *</p>  <p>[®] Black natural iron *</p>  <hr/> <p>* with transparent protective paint</p>	L15 W18 H59
