— The concept of Shapes Mirrors is based on the study of ancient mirrors and their using methods.

Built on traditional gestures but with a completely new and contemporary outline: the division mirror-handle is minimized without surface variations, but with a polished-brushed finish that highlights the craftsmanship. Shapes Mirrors are meant to be used within the domestic environment as a decorative object, due to the natural weight of the metal.

Smaller sized pieces can fit and be carried inside a purse, handbag or pocket, and become a portable everyday luxury feature.
